Storytime/Literacy activity

Centers 11:00-12:00

Second Circle/ math and science 12:00-12:15

Lunch 12:15-12:45

Clean up and go home

The Pre-K class is a kindergarten readiness program where students are taught the social, emotional and cognitive skills necessary to meet the rigorous expectations of Connecticut kindergarten standards. Our 5 day program allows us the additional time to go into further study of science and math activities.

Children are exposed to activities that promote cognitive growth, language and literacy, math, science, social and physical activities. Children work on recognizing and writing their own names, along with the names of their classmates. Letter work includes sound and symbol relationship and an intro to letter formation. Numeracy lessons include sequencing, patterning, measuring, counting and number ID. Science and problem solving activities are built into our Themes. Play activities are both teacher designed as well as open ended for children to explore and Independent skills are fostered to further prepare your child for Kindergarten. All children work on self help skills such as zipping, hand washing and organizing their belongings. Having Lunch at school will allow your child to practice, in a group setting, the skills they will need to successfully eat Lunch in Kindergarten.
